

Hi Customer,

The SPORIFY team would like to thank all existing customers for their valued support throughout 2021, and warmly welcome any new customers to the SPORIFY community.

**Don't Miss Our Q1 User Group Meeting.

2021 was a very successful year for SPORIFY. Version 21.1's release in April saw the addition of new substance targets and an improved substance interface, while version 21.3, which was

released in September, introduced a highly requested commenting feature for mapped records. We also included a new data insights module to provide much-needed transparency related to data quality.

CorrIT Academy

At the end of 2021, we soft-launched the CorrIT Training Academy, which will provide detailed on-demand training courses for SPORIFY users and administrators. If you didn't get a chance to try it out in the test phase, don't worry – it will be made available for all users later this year.

The Company

The SPORIFY team grew in 2021, with 11 new colleagues joining us.

Partnerships

We also formed several new alliances, joining forces with Navitas Life Sciences and IQVIA to provide SPORIFY consulting services to their clients along with technical integrations to their RIM platforms.

Our 22.1 release will launch the integration to Veeva Systems' Vault platform.

To learn more about our partners and the services they provide, please don't hesitate to contact us.

News

We are proud to announce that CorrIT has been named Best Software, Project Management & System Design Solutions 2022 by the Irish Enterprise Awards.

Furthermore, CorrIT's Luciana Paglietta has been named one of the top 15 Agile coaches in Dublin by Influence Digest.

There are plenty of exciting things in store for SPORIFY customers this year, including the SPORIFY release 22.1 at the end of Q1, which will see the implementation of the much-anticipated data governance module, as well as the new Veeva Vault integration. We expect more data integrations to follow later in the year, as well as the introduction of FDA Vocabularies and SPOR SMS Substances.

Upcoming Events

Gary will be attending the Global Pharmaceutical Regulatory Affairs Summit in Berlin between 6-8 April and would be delighted to meet you at the event if you are in attendance.

The first virtual User Group Meeting of the year has been organised for March 23 at 15:00 CET.

Gary will present our upcoming features along with our roadmap for 2022.

Our guest speaker, Patrick Middag from Bristol Myers Squibb will join us to provide IDMP and SPOR insights.

To sign-up to the virtual meeting follow the link below.

We will make a recording available to all who sign-up to the virtual meeting for 30 days after the event.
