

October Newsletter

As we enter the month of October, we can't quite believe that we are already over three quarters of the way through 2023! Between various events, a new release, and working alongside ArisGlobal to continue to grow and enhance SPORIFY, it has certainly been a busy time for all the team.

We are very pleased to bring you the current news and reflect on the past few months in this latest edition of the SPORIFY newsletter.

News & Reflections

We are very happy to announce that Veeva named SPORIFY one of its Top 10 Solution Providers in the August edition of Pharma Tech Outlook. SPORIFY also featured as the cover story, which provides a comprehensive overview of the tool, its advantages and the role it plays in IDMP alignment. If you would like to read this article, it can be accessed via the button below.

Over the past few months, SPORIFY has taken part in several international events.

Gary Wilson spoke at ArisGlobal Breakthrough in Chicago in May, as well as Amplexor Life Sciences Be The Expert conference in Split in June. Both of these events were hugely successful and Gary was delighted to have the opportunity to speak about how SPORIFY can help support data alignment processes for pharmaceutical and life sciences companies worldwide.

Conor Corr and Gary Wilson also attended the Veeva R&D and Quality Summit in Boston earlier this month. They were very pleased to meet several SPORIFY customers and connect with various industry leaders over the course of this fantastic event.

SPORIFY 23.1.1

SPORIFY 23.1.1 was released early in July. It was a minor release responding to changes that EMA was making to its SPOR OMS API. EMA now employs an API request rate limiting mechanism that allows a maximum of 60 requests per minute per user and 1000 requests per minute for all users. As this applies to SPOR OMS ORG and LOC API endpoints that are used during the daily SPORIFY sync, we enhanced our OMS sync to ensure that it works with these SPOR API changes. We also took the opportunity to include some security patches and bug fixes in this release.

Upcoming Events

We will be attending the Global Pharmaceutical Regulatory Affairs Summit in Brussels from 23-25 October. This summit will focus on the topics of Regulatory Information Management, Global eSubmissions, Regulatory Guidance and Legislative Landscape, and Regulatory Affairs in Global Markets. Use the button below to book an in-person or digital pass for this event.

[GPRAS Summit](#)

We will also be attending the TOPRA Annual Symposium in Lisbon, which is also being held from 23-25 October. This event is an annual conference for healthcare regulatory affairs featuring speakers from industry, regulatory and academic sectors. Register for this symposium using the button below.
