

We are pleased to announce that we have addressed some customer feedback during our 2023.1.3 Validation period, and we have re-released to include four fixes to the Validation environment on Sunday, 30 June.

We corrected two known issues detailed in the release notes: SPRFY-1303 and SPRFY-1306, and introduced a fix for SPRFY-1288, which was an issue with password reset for tenants who had configured passwords to expire after a specified amount of time.

Details of updates associated with this release can be found in the [Release Notes](#) section of the SPORIFY navigation menu. We are also pleased to deliver, as suggested by our customers, a Release Walkthrough video available at the same link for you to refer to.

Any feedback about this walkthrough would be greatly appreciated.

If you have any questions, please email us at info@sporify.eu.

Kind regards,
