1. Purpose

To verify the below user requirements:

IR_VEEVA_005: The system shall allow the user to manually run a full Veeva sync of Substances, Products, Organisations, and Referentials.

IR_VEEVA_006: The system shall allow the user to manually run a Veeva sync of Products.

IR_VEEVA_009: The system shall allow the user to add the mapping configuration medicinal_product__rim to the Veeva Mapping Configuration.

IR_VEEVA_010: The system shall allow the user to edit or delete the mapping configuration medicinal_product__rim from the Veeva Mapping Configuration.

IR_VEEVA_011: The system shall allow the user to view the Veeva Job Log to see Product Module related actions.

IR_VEEVA_012: The system shall validate Veeva Vault credentials (subdomain, username, password) during connection setup and prevent saving the connection until valid credentials have been provided.

IR_VEEVA_014: The system shall allow the user to run manual syncs for Referentials only, Organisations only and Substances only from the Veeva Configure screen.

IR_VEEVA_017: The system shall allow the user to define and save scheduled syncs (hourly, daily, weekly, monthly) from the Veeva Configure screen.

IR_VEEVA_018 (2026.2.0.0-PROD-00012): The system shall allow the user to view and filter the Job Log, export it to Excel, and see sync details from the Veeva Configure screen.

2026.2.0.0-PROD-00010: The system shall update Veeva products with the PMS ID based on the product match in SPORIFY if the Veeva write synchronization is enable.

2026.2.0.0-PROD-00029: The system shall fetch actual product data directly from Veeva Vault via the Loader, so that a regulatory expert sees the current Veeva product data rather than a PMS-derived copy exported via FHIR.

2026.2.0.0-PROD-00030: The system shall fetch the latest FHIR message exported in Veeva via the Loader, so that the regulatory expert works from the most recent export in case Veeva provides one.
