Document Name:	AG_SPOR_RA	Document Version:	6.0

SPORIFY 2026.2.0.0

Document History

Action	Reason for Change	Document Version	Date (DD-MMM-YYYY)
Initial Document Added requirements of 2023.1.3 release.	As part of SPORIFY 2023.1.3 release	0.1	30-APR-2024
Approved	Approved Document	1.0	08-MAY-2024
Added below requirements as part of 2023.1.5.0 release. IR_VV_04, FR_PMS_DASH_01 to FR_PMS_DASH_08, FR_PMS_SOURCE_01 to FR_PMS_SOURCE_10, FR_PMS_TARGET_01 to FR_PMS_TARGET_07, FR_ADMIN_01 to FR_ADMIN_04, FR_PMS_NOTIF_01, FR_MISC_06 Updated Note and Definitions, Acronyms and Abbreviations sections	As part of SPORIFY 2023.1.5.0 release	1.1	19-AUG-2025
Approved	Approved Document	2.0	29-AUG-2025
Added below requirements as part of 2025.2.0.0 release: FR_PMS_DASH_09 to FR_PMS_DASH_14, FR_PMS_SOURCE_11 to FR_PMS_SOURCE_13, FR_PMS_TARGET_08 to FR_PMS_TARGET_10, FR_ADMIN_05 Mapped Release Number and Requirement ID reference for the below requirements as part of 2025.2.0.0 release without any changes in RA description: FR_PMS_SOURCE_07, FR_PMS_TARGET_01, FR_PMS_TARGET_02 Updated Definitions, Acronyms and Abbreviations section Updated Reference Documents (section 5)	As part of SPORIFY 2025.2.0.0 release	2.1	20-OCT-2025
Approved	Approved Document	3.0	24-OCT-2025
As part of this release 2026.1.0.0, existing requirement IDs were refactored to align with the new modular structure. The following mappings apply: ER_HW_SW_01 is changed to ER_HW_SW_001, IR_VV_01 to IR_VV_04 are changed to IR_VEEVA_001 to IR_VEEVA_004, FR_BULK_RES_01 is changed to FR_ORG_SL_011, FR_BULK_RES_02 is changed to FR_REF_SL_025, FR_BULK_RES_03 is changed to FR_SUB_SL_035, FR_BULK_GOV_01 is changed to FR_ORG_GOV_010, FR_BULK_GOV_02 is changed to FR_REF_GOV_010, FR_BULK_GOV_03 is changed to FR_SUB_GOV_010,	As part of SPORIFY 2026.1.0.0 release	3.1	10-APR-2026

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

Action	Reason for Change	Document Version	Date (DD-MMM-YYYY)
FR_BULK_GOV_04 is changed to FR_ORG_GOV_011, FR_PMS_DASH_10 to FR_PMS_DASH_14 are changed to FR_PROD_OV_010 to FR_PROD_OV_014, FR_PMS_SOURCE_02 is split into FR_PROD_SRC_003 and FR_PROD_SRC_004, FR_ADMIN_01 to FR_ADMIN_03 are changed to FR_PROD_ADM_001, FR_PROD_ADM_002, FR_ADMIN_04 is deleted as it was duplicate of FR_ADM_RES_003 and corresponding Req ID is mapped, FR_ADMIN_05 is changed to FR_PROD_ADM_004, FR_PMS_NOTIF_01 is changed to FR_PROD_NOTIF_001, FR_MISC_01 to FR_MISC_03 are changed to FR_MISC_001 to FR_MISC_003, FR_MISC_04 is changed to FR_ADM_RES_003, FR_MISC_05 is changed to FR_MISC_004, FR_MISC_06 is changed to FR_ORG_EXP_006. Rationale: Requirement IDs have been renamed to follow a consistent, domain-based naming convention and revised section structure (by module and feature area), improving traceability, readability, and maintainability. This refactoring does not change the functional scope of the requirements.			
Mapped below exiting URDs with the release number as 2026.1.0.0 and respective Requirement ID as part of the release 2026.1.0.0. FR_PROD_OV_001 to FR_PROD_OV_009, FR_PROD_SRC_001 to FR_PROD_SRC_014, FR_PROD_TGT_001 to FR_PROD_TGT_010, FR_PROD_ADM_003	As part of SPORIFY 2026.1.0.0 release	3.2	10-APR-2026
Added below requirements as part of 2026.1.0.0 release: IR_VEEVA_005 to IR_VEEVA_018, FR_PROD_OV_015, FR_PROD_OV_016, FR_PROD_SRC_015 to FR_PROD_SRC_031, FR_PROD_TGT_011 to FR_PROD_TGT_015, FR_PROD_COMP_001 to FR_PROD_COMP_016, FR_PROD_ADM_005, RR_CFR_ER_01 to RR_CFR_ER_08, RR_CFR_ES_01, RR_CFR_CC_01 to RR_CFR_CC_05, RR_CFR_IC_PD_01 to RR_CFR_IC_PD_03	As part of SPORIFY 2026.1.0.0 release	3.3	10-APR-2026
Added below Legacy requirement and mapped to the release 2026.1.0.0: FR_ORG_OV_001, FR_ORG_SL_001 to FR_ORG_SL_027, FR_ORG_TGT_001 to FR_ORG_TGT_009, FR_ORG_HIST_001 to FR_ORG_HIST_004, FR_ORG_CR_001 to FR_ORG_CR_005, FR_ORG_GOV_001 to FR_ORG_GOV_009, FR_ORG_EXP_001 to FR_ORG_EXP_005, FR_REF_OV_001 to FR_REF_OV_007, FR_REF_SL_001 to FR_REF_SL_024,	As part of SPORIFY 2026.1.0.0 release	3.4	10-APR-2026

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

Action	Reason for Change	Document Version	Date (DD-MMM-YYYY)
FR_REF_TGT_LIST_001 to FR_REF_TGT_LIST_013, FR_REF_HIST_001, FR_REF_HIST_002, FR_REF_CR_001 to FR_REF_CR_004, FR_REF_GOV_001 to FR_REF_GOV_009, FR_REF_EXP_001 to FR_REF_EXP_009, FR_SUB_OV_001 to FR_SUB_OV_010, FR_SUB_SL_001 to FR_SUB_SL_034, FR_SUB_SL_036 to FR_SUB_SL_038, FR_SUB_TGT_001 to FR_SUB_TGT_004, FR_SUB_GOV_001 to FR_SUB_GOV_009, FR_SUB_EXP_001 to FR_SUB_EXP_005, FR_ADM_DG_SET_001 to FR_ADM_DG_SET_007, FR_ADM_RES_001, FR_ADM_RES_002, FR_ADM_USR_001 to FR_ADM_USR_022, FR_ADM_ORGU_001 to FR_ADM_ORGU_006, FR_ADM_SUPP_001 to FR_ADM_SUPP_003, FR_USR_PROF_001 to FR_USR_PROF_005, FR_ACC_MNG_001 to FR_ACC_MNG_004, FR_PASS_MNG_001, FR_ADM_SEC_001 to FR_ADM_SEC_003, FR_ADM_MATCH_001 to FR_ADM_MATCH_005, FR_ADM_EMA_001 to FR_ADM_EMA_004, FR_ADM_ENT_001 to FR_ADM_ENT_003, FR_ADM_LOG_001 to FR_ADM_LOG_015, FR_DOC_SPOR_001 to FR_DOC_SPOR_003, FR_MISC_005 to FR_MISC_020 Updated note and reference documents section.			
Approved Document	Approved Document	4.0	20-APR-2026
Added below requirement as part of 2026.1.1.0 release: 2026.1.1.0-ADM-00001	As part of SPORIFY 2026.1.1.0 release	4.1	10-JUN-2026
Updated URD # and mapped Release Number and Requirement ID reference for the below URD's as part of 2026.1.1.0 release with changes in URD description FR_PROD_SRC_029 (2026.1.1.0-PROD-00004), FR_PROD_COMP_015 (2026.1.1.0-PROD-00003), FR_PASS_MNG_001 (2026.1.1.0-ADM-00002).	As part of SPORIFY 2026.1.1.0 release	4.2	10-JUN-2026
Mapped Release Number and Requirement ID reference for the below URD's as part of 2026.1.1.0 release with changes in URD description: FR_ADM_USR_006, FR_ADM_USR_007, FR_ADM_USR_008, FR_ADM_USR_013	As part of SPORIFY 2026.1.1.0 release	4.3	10-JUN-2026
Updated RPN and OP column values from high to medium for the URD ID below: FR_ADM_USR_013, FR_PASS_MNG_001 Updated Note section.	As part of SPORIFY 2026.1.1.0 release	4.4	10-JUN-2026
Approved Document	Approved Document	5.0	15-JUN-2026

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

Action	Reason for Change	Document Version	Date (DD-MMM-YYYY)
Added below requirements as part of 2026.2.0.0 release: 2026.2.0.0-PROD-00007, 2026.2.0.0-PROD-00010, 2026.2.0.0-PROD-00011, 2026.2.0.0-PROD-00021, 2026.2.0.0-PROD-00022, 2026.2.0.0-PROD-00023, 2026.2.0.0-PROD-00024, 2026.2.0.0-PROD-00025, 2026.2.0.0-PROD-00026, 2026.2.0.0-PROD-00027, 2026.2.0.0-PROD-00028, 2026.2.0.0-PROD-00029, 2026.2.0.0-PROD-00030, 2026.2.0.0-PROD-00032, 2026.2.0.0-PROD-00033, 2026.2.0.0-PROD-00036	As part of SPORIFY 2026.2.0.0 release	5.1	13-AUG-2026
Updated URD #, Mapped Release number and Requirement ID reference for the below URD # with changes in Risk Scenarios and C&M as part of 2026.2.0.0 release: 2026.2.0.0-PROD-00005 (FR_PROD_SRC_002), 2026.2.0.0-PROD-00006 (FR_PROD_SRC_003), 2026.2.0.0-PROD-00012 (IR_VEEVA_018), 2026.2.0.0-PROD-00013 (FR_PROD_TGT_001), 2026.2.0.0-PROD-00019 (FR_PROD_SRC_020), 2026.2.0.0-PROD-00020 (FR_PROD_COMP_010), 2026.2.0.0-PROD-00031 (FR_PROD_SRC_011)	As part of SPORIFY 2026.2.0.0 release	5.2	13-AUG-2026
Mapped Release number and Requirement ID reference for the below URD # with changes in Risk Scenario and C&M as part of 2026.2.0.0 release: 2026.1.1.0-PROD-00003 (FR_PROD_COMP_015), 2026.1.1.0-PROD-00004 (FR_PROD_SRC_029), FR_PROD_SRC_014	As part of SPORIFY 2026.2.0.0 release	5.3	13-AUG-2026
Updated URD #, Mapped Release number and Requirement ID reference for the below URD # without changes in Risk Scenario and C&M as part of 2026.2.0.0 release: 2026.2.0.0-PROD-00016 (FR_PROD_SRC_006), 2026.2.0.0-PROD-00034 (FR_PROD_TGT_012)	As part of SPORIFY 2026.2.0.0 release	5.4	13-AUG-2026
Updated RPN and OP column values from high to medium for the URD # FR_ORG_SL_022	As part of SPORIFY 2026.2.0.0 release	5.5	13-AUG-2026
Mapped Release number and Requirement ID reference for the below URD # without changes in Risk Scenario and C&M as part of 2026.2.0.0 release: FR_PROD_TGT_009, FR_PROD_TGT_010, FR_PROD_TGT_013	As part of SPORIFY 2026.2.0.0 release	5.6	21-AUG-2026
Approved Document	Approved Document	6.0	21-AUG-2026

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

Term	Description
URD	User Requirements Document (This document defines clearly and precisely what the customer wants the system to do).
US	United States
User	The person or persons who operate or interact directly with the system.

2 Purpose

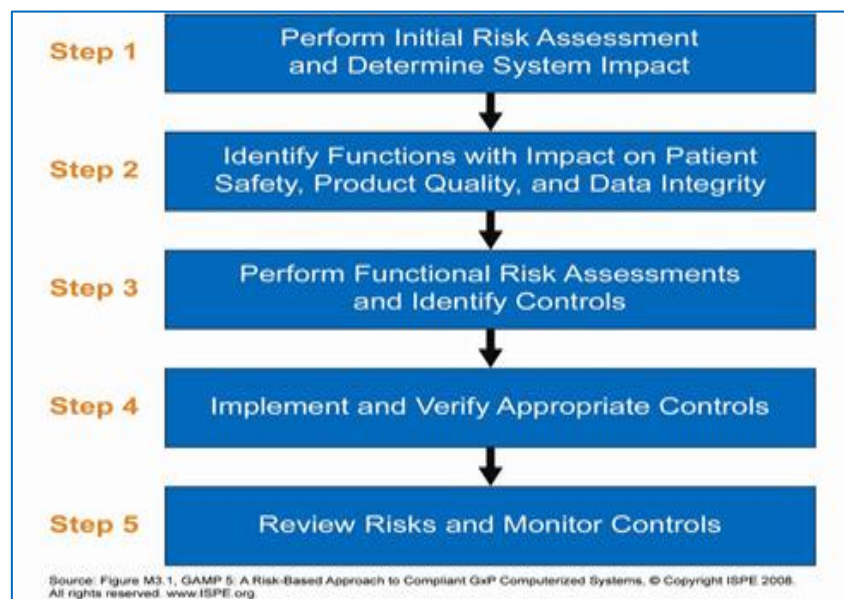

This document explains the risk analysis process that is being followed for determining the scope of validation. The purpose of the risk assessment is to maximize the benefits of safe operations of the system and minimize potential risks to patient safety, product quality and data integrity. The approach followed here is as per Good Automated Manufacturing Practice 5 (GAMP 5) guidelines.

3 Scope

For the scope of this document, risk is defined as the combination of the probability of occurrence of business impact against the requirement and the severity of that event.

4 Risk Assessment Process

The GAMP 5 based Quality Risk Assessment process addresses the following five steps.

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

4.1 Initial Risk Assessment

This is the first step of the risk assessment process. The assessment includes a decision whether the system is GxP regulated or not and includes an overall assessment of the system impact.

GAMP 5 based Category	Brief Description	Description	Examples
Category 1	Infrastructure Software	Layered software (upon which applications are built) Software to manage the Operating environment	Operating Systems like Windows, Solaris Application servers like WebSphere, WebLogic
Category 2	<i>Firmware</i>	<i>This category is no longer used in GAMP 5</i>	
Category 3	Non-configured Software	Parameters entered & stored; but the software cannot be configured	Standard LifeSphere® Product with default configuration
Category 4	Configurable Software Packages	Complex software: that can be configured to suit the needs. Software code is not altered	Configured LifeSphere® product to satisfy business process
Category 5	Custom (Bespoke) Software	Custom designed software; designed & coded to suit the needs	Enhanced LifeSphere® product to suit the business requirements specific to the customer need.

As per software categories defined in GAMP5 and ArisGlobal process on Computer System Validation, this implementation will come under GAMP5 Category 4 and thus shall follow validation process of GAMP5 Category 4 requirements during the pre-validation

4.1.1 GxP Determination

- List down various systems/processes
- Verify use of each module against the table mentioned below.
- A 'yes' to any question in the table identifies the system module contains GxP critical processes which needs risk assessment.

System obtains, stores, or distributes Life Science regulated data for agency review.

REGULATED ENVIRONMENT ASSESSMENT		
Assessment Questions (A 'yes' to any question identifies the system as regulated)	YES	NO
Does the system manage data that will be submitted to the regulatory authorities?	☒	☐
Does the system manage data that might be called under regulatory review?	☒	☐
Does the system have either a direct or indirect impact on another regulated system? (Ex: Integration of LSMV with any EDC system)	☒	☐

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

REGULATED ENVIRONMENT ASSESSMENT		
Assessment Questions (A 'yes' to any question identifies the system as regulated)	YES	NO
Is the system used to perform or track regulated activities for GxP facilities or equipment (e.g., validation, calibration, cleaning, maintenance)?	☐	☒
Is the system used to monitor security, access, or regulated communications?	☐	☒
Is the system used to monitor facilities that affect any regulated system or process?	☐	☒
Does the system support data storage for any other regulated GxP process (e.g., training, backup, change control, document control)?	☒	☐
Does the system support data access or availability for any other regulated GxP process?	☒	☐
Regulated System (check only one) A 'yes' to any question above identifies the system as regulated needing Risk Assessment.	☒	☐

4.1.2 System Impact

Use of this product has direct impact on following criteria:

- Impact on generating, manipulating, or controlling data supporting regulatory safety and efficacy submissions.
- Impact on control of critical parameters or data used
- Impact on control of data for product release
- Impact on controlling adverse event or complaint recording

Hence, it is determined that the product has high impact on overall product quality, patient safety and data integrity. And, further detailed functional assessment needs to be performed.

4.2 Functional Risk Assessment

Module wise processes are listed and evaluated for assessment of risk to patient safety, product quality and/or data integrity. It involves mainly following steps.

1. Identifying GxP Risk
2. Identifying Risk Scenarios
3. Assessing the likelihood of An Adverse Event
4. Assessing the severity of impact
5. Detection of adverse impact
6. Overall priority

These steps are explained below.

Point number 1 & 2 are linked with User Requirements Document (URD).

Point number 3, 4 and 5, ascertains the prioritization of risk in High/Medium/Low categories.

Point number 6 covers the overall priority based on results obtained in 3, 4 and 5.

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

4.2.1 Identifying GxP Risk

System function parameters are evaluated and identified whether they represent a risk when assessed against a series of GxP criteria.

Following types of risks are mainly identified during risk assessment process for use of the systems for implementation of business processes in regulatory environment:

- Risks towards non-availability of required documentation
- Risks towards non-availability of required process document / guidelines
- Risks towards non-availability of system Access Control
- Risks towards abnormal user operation performed at the time of system operation
- Risks towards incorrect configuration of system
- Risks towards Improper and/or inadequate training
- Risks towards implementation electronic records management as per US FDA 21 CFR Part 11 rule
- Risks towards compliance to data privacy

4.2.2 Identifying Risk Scenarios

Having determined that a particular function may have a GxP risk associated with it, the assessment proceeds to identify the various risk scenarios i.e., the events that identify the risks associated with use of the system.

The functions identified are analyzed by considering possible hazards/adverse effects and what controls may be needed to minimize the potential harm.

4.2.3 Assessing the Likelihood of a Hazard/Adverse Event

After identifying hazards / adverse events, determine the likelihood (frequency or probability) of it occurring. User considers the likelihood of the adverse event occurring per number of cycles and assigns a value to that estimate.

Ranking of likelihood methods are defined as follows:

The processes which are internally controlled by software (user can't modify) and have been tested thoroughly during software development, may be considered as 'Low' risk. For example:
- Display parameters, print records.

The processes, which are controlled by users and are due to possibility of human error and non-availability of system control, may be considered as 'Medium' risk. For example: - Change in set parameters

In many instances, adverse events may be as the result of the systematic software faults, such as software bugs and the team may be unable to estimate the likelihood of such an adverse event. In such instances risk considered is 'High' risk.

Ranking for Assessing the Likelihood of a Hazard/Adverse Event

Table – I

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

Value	(P) Probability of Failure (Likelihood of event occurring)	Remarks
3	High(H)	Hazards will probably occur with high frequency. If it is impossible to estimate the likelihood of a fault occurring, the probability is high. Risk to be reviewed whenever any kind of upgrade to the software is done. This includes all major, minor, and patch upgrades.
2	Medium(M)	Hazards will probably occur with moderate frequency. (Function performed by configured software or custom hardware). Risk to be reviewed whenever any major upgrade is done to the software. That is, releases with version number X.Y.Z (e.g. TS 6.3.3).
1	Low(L)	Hazard is known to be unlikely to occur. (Function performed by standard software or standard hardware). Risk to be reviewed whenever there is any minor or patch upgrade.

4.2.4 Assessing the Severity of Impact

After determining likelihood of adverse event, severity of its impact on process is assessed. These effects take into account impact on regulatory compliance, impact on business critical functionality, impact on patient safety, impact on product quality and impact on data integrity.

The impact of risk occurring may be described as follows:

The processes, which do not directly affect the final output of the system/software, may be considered as 'Low'. For example: - Warning messages, reference parameters, etc.

The processes which are used in the initial stage of operation, however it may affect the final output but those are not used for final release of output, may be considered as 'Medium'. For example: Partial Feature Unavailability, Intermittent System Error etc.

The processes, which are used in the final stage of operation and are used for final decision for output, may be considered as 'High' in ranking of severity. For example: Audit Trail Not Captured, Integration Failure, Data Loss, etc

Ranking of Adverse Event Severity

Table – II

Value	(S) Severity of Event (Consequence)	Remarks
3	High(H)	Harm will be a serious non-compliance or business risk if it occurs.

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

Value	(S) Severity of Event (Consequence)	Remarks
		Can cause serious adverse health consequences, which can threaten the life of the patient or even death
2	Medium(M)	Harm will cause a non-compliance or business risk if it occurs. Temporary or reversible adverse health consequences, but the life of the patient is not threatened.
1	Low(L)	Harm will not cause a non-compliance or business risk. No effect/Impact for patients.

4.2.5 Detection of Failure

Next step is to identify if the adverse event can be recognized or detected by other means in the system. Adverse event having high probability of detection, may not pose a serious threat because it can be recognized quickly, and suitable corrective action taken to mitigate its impact. If an adverse event has a low probability of detection, then the risk condition needs the review of the design or the implementation of alternative procedures to avoid the event.

Adverse event is detected at final stage of output or after release of output or may not be detected, may fall in ranking 'Low' detection. For example: non-availability of process or guideline document, usage of these documents, Training, wrong selection of operation etc.

The processes with adverse events are advanced to next stage of operation; however, that adverse event can track down before final release of output may fall in ranking 'Medium.' For examples: wrong selection of set parameters.

The processes with adverse events which are identified by system and highlighted with error message may fall in ranking 'High' detection. For example: alarm message, trip conditions, etc.

Ranking of level of Detection of Failure

Table – III

Value	(D) Level of Detection of failure	Remarks
1	High (H)	The risk can be easily detected through deployed control measure/system and the detection system is automated.
2	Medium (M)	The risk can be detected later through deployed control measure/system and the detection is through manual method.
3	Low (L)	The risk cannot be detected through deployed control measure/system the detection is possible after longer period/interval.

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

4.2.6 Overall Priority

Overall priority is calculated using RPN number methodology. RPN means Risk Priority Numbering and in it multiplication of the all three assessments are done.

$$\text{RPN} = \text{Severity} \times \text{Likelihood} \times \text{Detection}$$

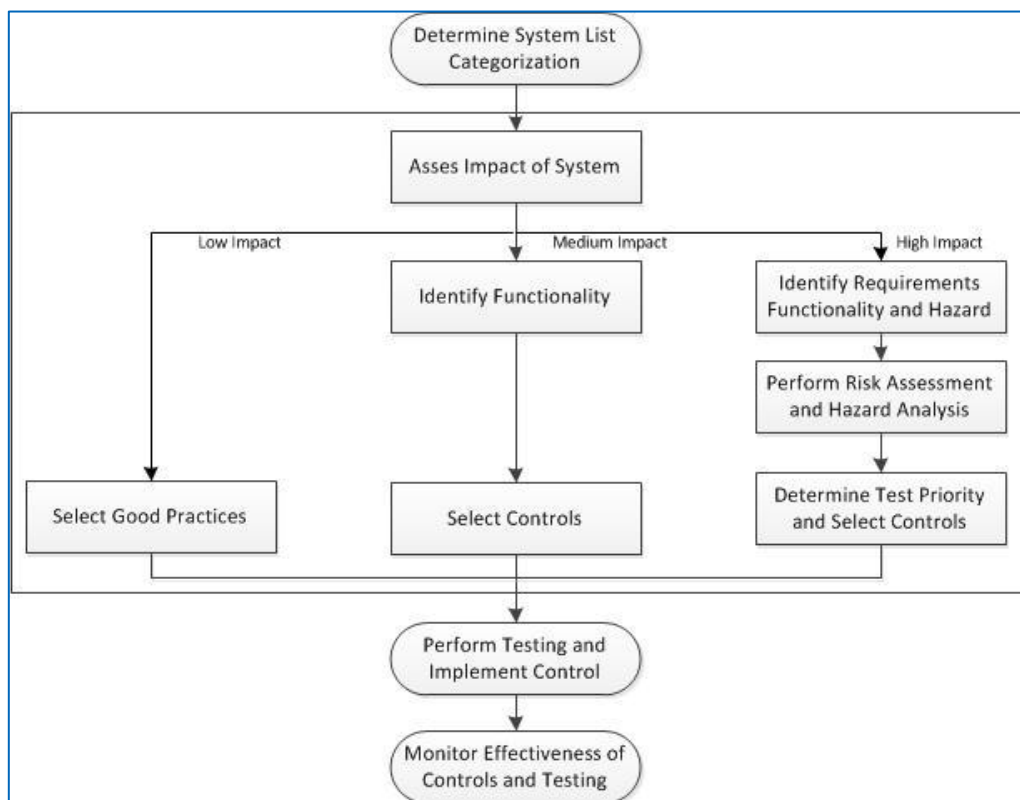

Overall priority	Overall priority calculation result
Low	RPN between 1 to 4
Medium	RPN between 5 to 8
High	RPN between 9 to 27

4.2.7 Controls and measures

OQ should be prepared on following basing and executed to ensure risk mitigation

- For low risk functions, no or little functional testing is required.
- For medium risk functions, testing will be done for generic failure modes i.e., what will happen if function fails.
- For high impact functions, **the relevant specific risk scenarios** are to be tested.

The overall Risk Based Validation path is depicted in flow diagram below:

7 Risk Analysis Form

Abbreviations used in the Risk Analysis Form table header:

Abbreviation	Description
P	Likelihood or P robability of risk
S	S everity or Business Impact of risk
D	Level of D etection of risk
RPN	R isk P riority N umbering = $P * S * D$
OP	O verall P riority of risk based on RPN
C&M	C ontrols and M easures

Note:

- Since there are no requirements with RPN ≥ 9 in SPORIFY 2023.1.3 release, Pre-Validation Plan, IQs, OQs, TM, PVSR are not available.
- Since there are no requirements with RPN ≥ 9 in SPORIFY 2023.1.5.0 release, Pre-Validation Plan, IQs, OQs, TM, PVSR are not available.
- Since there are no requirements with RPN ≥ 9 in SPORIFY 2025.2.0.0 release, Pre-Validation Plan, IQs, OQs, TM, PVSR are not available.
- All the existing Legacy requirements are added in the release 2026.1.0.0. Release number is mapped to 2026.1.0.0 and Requirement ID is mentioned as Legacy Product as there is no reference to Requirement ID for these.
- Since there are no requirements with RPN ≥ 9 in SPORIFY 2026.1.1.0 release, Pre-Validation Plan, IQs, OQs, TM, PVSR are not available.

Release:	SPORIFY 2026.2.0.0	Document Type:	Risk Analysis
Document Name:	AG_SPOR_RA	Document Version:	6.0

- From SPORIFY 2026.1.1.0 release, all the URD and RA contents are drafted and reviewed in the JIRA tool within the life cycle of the requirement drafting and review process.
- For instance, the unique URD ID 2026.1.1.0-ADM-00001 generated from the tool has the following elements.
2026.1.1.0 – Denotes the Release number.
ADM – Denotes the component of the requirement.
00001– Running sequence of the URD ID per release across all components.
- The new URD ID generated from the system, does not consider the previous URD ID sequence from the previous releases.
- From SPORIFY 2026.1.1.0 release onwards, the tool generated URD ID will not have sub-component beyond the main component.
- No other residual risks are identified as part of SPORIFY 2026.2.0.0 release.
