	 The screenshot shows a web browser displaying the 'Sporify API-preval' documentation. The page has a dark header with 'Catalog', 'Documentation', and 'Sign in' links. Below the header, there's a 'SUBSCRIBE' button and a search bar. The main content area is titled 'Getting Started' and includes an 'Authentication' section. It explains that every endpoint requires an OAuth2 JWT bearer token issued by Auth0. Two steps are listed: 1. 'Get credentials' (contacting the Sporify platform team) and 2. 'Request a token' (using a POST request to the token endpoint). A sample JSON payload for the token request is provided, and an example URL for the Development environment is given.
