

SPORIFY Webinar: Accelerating RIM System Compliance with AI and SPORIFY

Global regulatory change isn't slowing down. And for teams still relying on manual monitoring to keep pace, the compliance exposure is real — missed updates, delayed impact assessments, and findings that surface at the worst possible time.

There's a better way, and we're bringing the conversation live.

Join us for **Accelerating RIM System Compliance with AI and SPORIFY** to see how life sciences organizations are embedding AI into their regulatory workflows without overhauling their existing environment.

In this session, you'll learn how to:

- Replace manual monitoring with GenAI-driven intelligence to reduce effort and improve compliance outcomes
- Bring AI capabilities into your regulatory environment as modular, system-agnostic add-ons
- Accelerate SPOR and ISO IDMP compliance through automated reference data governance
- Surface regulatory changes automatically — before they become a compliance issue

This webinar features:

➔ **Gary Wilson**, Vice President, Global Customer Excellence, SPORIFY

➔ **Hans Van Leeuwen**, Regulatory Expert

➔ **Ian Crone**, Vice President, Regulatory Strategy & Growth
