

We hope that you have had a great start to the year! The SPORIFY team have lots of exciting plans for the coming months, and we look forward to continuing to work with you throughout 2025 and beyond.

In our first newsletter of 2025, we reflect on the year gone by and anticipate what is next for SPORIFY.

Reflections on 2024

2024 was a busy and productive year for SPORIFY. We released several new iterations of the SPORIFY tool, which saw the introduction of various improvements and new features. One of our most popular enhancements was the addition of a bulk update feature in the Data Governance and Resolution Status modules, which allows users to update multiple records simultaneously. We also made well-received improvements to the Veeva Sync, which now enables users to import previously mapped SPOR records. Likewise, our developers spent time preparing SPORIFY's backend for the upcoming implementation of PMS.

Throughout the year, we were delighted to meet many of our valued customers at numerous conferences across the globe. We attended RSIDM in North Bethesda, Breakthrough in London, Breakthrough Innovators and the 21st DIA Japan Annual Meeting in Tokyo, Breakthrough Regulatory in Lisbon, Veeva R&D and Quality Summits in Boston and Madrid, the TOPRA Symposium in Rotterdam, and GPRAS in Brussels.

In October, we co-hosted the 'Getting Ready for IDMP: The Importance of Reference Data Management' webinar with Veeva. Featuring guest speakers from SPORIFY, Veeva, BMS, and GSK, this highly successful event provided attendees with useful advice about how to integrate with SPOR databases and manage referential datasets, as well as fascinating insights into SPORIFY's role in helping users achieve IDMP alignment. If you did not get a chance to attend this webinar, we have provided a link to the recording via the button below.

What's Next for SPORIFY

We have two major SPORIFY releases planned for 2025. To mention but a few new features, these releases will include the introduction of PMS, as well as integrations with FDA DECRS, PQCMC, Health Canada Vocabularies, and SPL. They will also contain a variety of performance upgrades to improve the user experience. More details will be provided prior to their launch dates.

Upcoming Events

We are pleased to announce that we will be attending DIA's Regulatory Submissions, Information, and Document Management Forum in North Bethesda, Maryland from the 3rd to the 5th of February. At RSIDM 2025, we will hear from industry and regulatory experts about current data standards, ever-evolving data requirements, and different regulatory information management approaches.

We are also looking forward to our premier event of the year, Breakthrough 2025, which is being held in Zurich, Switzerland from the 18th to the 19th of March. Attendees will hear from a whole host of guest speakers with life sciences, pharmaceutical, and regulatory expertise. All SPORIFY customers are invited, so we hope to see many of you there! Sign up using the button below.
