

Welcome to the second newsletter of 2026, where we reflect on the successes of the past months and anticipate SPORIFY's upcoming milestones and events.

Reflections

So far, 2026 has been a busy and productive year for the SPORIFY team.

In February, we attended Breakthrough 2026 in Madrid, where we heard from leading biotech, pharmaceutical, regulatory, and technology experts about the future of pharmacovigilance and regulatory operations.

We were also at DIA's Regulatory Submissions, Information, and Document Management Forum in North Bethesda, Maryland in February. This event saw industry and regulatory stakeholders come together to discuss the rapid evolution of data standards, current regulatory requirements, and how to implement effective regulatory information management approaches.

In March, we attended DIA Europe 2026 in Rotterdam, where various regulators, industry leaders, patient representatives, and other members of the life sciences community connected in order to address key challenges in the industry.

The 'Accelerating RIM System Compliance with AI and SPORIFY' webinar was held in April. Guest speakers Gary Wilson, Hans Van Leeuwen, and Ian Crone talked to attendees about how modular, AI-powered solutions can help life sciences organisations track global regulatory changes, accelerate SPOR and ISO IDMP compliance, and unlock new value from existing RIM investments without disruptive system overhauls. As always, it was wonderful to be able to present SPORIFY to a new audience and introduce them to all that the tool has to offer.

In the meantime, our developers have been hard at work expanding and improving the SPORIFY tool for customers. Our most recent release, SPORIFY 2025.2.0.1, came out last month. The team has also been spending time preparing for the delivery of our upcoming release, SPORIFY 2026.1, about which more information can be found in the next section of this newsletter.

What's Next for SPORIFY?

Our next release, SPORIFY 2026.1, will be made available to customers on July 25, with the UAT of Validation phase running from June 8 to July 17. It introduces a number of highly-anticipated new features and enhancements, including:

- A Product Comparison feature
- Loading of Veeva Products
- A Product module on the new SPORIFY platform

We hope that you will enjoy exploring all that SPORIFY 2026.1 has to offer.

Finally, don't forget to follow us on LinkedIn!
