Document Name:	AG_SPOR_URD	Document Version:	4.0

2 Introduction

This User Requirements Document (URD) hosts the list of the SPORIFY components for version 2026.1.0.0.

2.1 Purpose

This User Requirements Document (URD) provides the details of URDs which have the list of functions to be carried out in respective releases. The requirement details are documented in this document (Refer Section 6 in this document).

3 System Description

SPORIFY provides a Simple, Secure, Single Solution to enable Mapping, Synchronisation and Notification services between your systems and SPOR master data with a streamlined workflow process.

4 Assumptions, Limitations and Exclusions

This section documents the assumptions, limitations, and exclusions in User Requirements Document.

4.1 Assumptions

- Pre-Validation testing will not be designed to test every possible scenario or requirement combination permitted by the product.
- The User Requirements Documents represent all the intended functions which will be in use as part of the business requirements.
- All targeted functions will undergo User Acceptance Testing designed to reflect usage in the production environment.

4.2 Limitations / Exclusions

- The functions not intended for use will be disabled or prohibited from use through users' roles and privileges.
- The functions not included in this URD document are not part of the business requirements.

5 Requirement and Requirement Category Format

5.1 Format of Requirements

The requirements documented in the following sections are presented in a tabular format indicating a Requirement Number (URD #) and a brief description of the requirement.

5.2 Format of Requirement Categories

The requirements are segmented into categories of functionality for clarity. Requirement categories or modules are represented by section codes. Requirements are grouped and identified by codes X_1 through X_n. Detailed requirements within groups are numbered sequentially (like <section code>_01, <section code>_02, <section code>_03).

For example:

1. DR – code for main section **Data Requirements**
DR_AER_REG – code for sub section under Data Requirements section

Product Name:	SPORIFY 2026.1.0.0	Document Type:	User Requirements Document
Document Name:	AG_SPOR_URD	Document Version:	4.0

DR_AER_REG_01 – code for individual requirement

The new Format consists of a release version, Module and JIRA generated ID.

For Example:

2. <2025.1.0.0>-<CSM>-<02850>

6 Requirement Classification

Each category of requirement is suitably classified and tabulated under one or more of the following types of requirements:

- **Environment requirement:** This includes all hardware and software requirements that are necessary to execute the IQ, CSCV and OQ scripts.
- **Third party / interface requirement:** This includes requirements for third party or any other interfacing. For example, requirements related to third party tools like Documentum, Livelink, BizConnect are third party requirements.
- **Regulatory requirements:** This includes requirements related to regulatory bodies. For example, requirements related to 21 CFR Part 11 compliance, are regulatory requirements.
- **Functional requirement:** This includes requirements that would enable the product to perform the business being automated. For example, case creation, workflow creation, case distribution are functional requirements.
- **Data requirement:** This includes all data related requirements that have an impact on **patient safety, product quality and data integrity**. For example, data definitions, data input, parameter settings, data migration are data requirements.

7 User Requirements Listing

Release Number	URD #	Description	Requirement ID
	ER	ENVIRONMENT REQUIREMENTS	
	ER_HW_SW	Hardware Software Requirements	
NA	ER_HW_SW_01	Refer Test Bed of individual IQs for the respective Hardware Software requirements. Note: This is not a testing requirement. Hence this requirement is not mapped in RA and TM	NA
	IR	INTERFACE REQUIREMENTS	
	IR_VEEVA	Veeva Integration & Synchronisation	

Product Name:	SPORIFY 2026.1.0.0	Document Type:	User Requirements Document
Document Name:	AG_SPOR_URD	Document Version:	4.0

Release Number	URD #	Description	Requirement ID
2023.1.3	IR_VEEVA_001	The system shall not include unmatched data in the Veeva sync, when Limit Unmatched Data Included in Sync by Resolution Status option in unchecked in Veeva Sync Configuration.	SPRFY-1047
2023.1.3	IR_VEEVA_002	The system shall display info panel in Veeva Sync Configuration and shall not be able to modify the value for Limit Target included in Sync by Governance Status when one or more domains have Data Governance turned off and the domain is listed as active in the mapping configuration.	SPRFY-1047
2023.1.3	IR_VEEVA_003	The system shall consider the below conditions for Veeva sync: 1. Merged Organisations to be included in Imported ID matches. 2. Merged IDs to be mapped to the surviving record. 3. Non-Current, Nullified, and Inactive statuses to be included in the sync for Imported IDs. 4. Imported IDs mapping shall work even when Advanced Template feature for mapping is turned off.	SPRFY-1047
2023.1.5.0	IR_VEEVA_004	The system shall allow the user to add, edit, delete the mapping configurations for the Veeva child objects (active_substance_translation_v and inactive_ingredient_translation_v) and sync data based on these mapping configurations for the child objects, auto-map the child records depending on the existing mapping for the parent records. 2026.1.0.0	FR_REF_SL_010	The system shall allow the user to hover the mouse over the progress bar to view the exact percentage of mapping progress.	Legacy Product
2026.1.0.0	FR_REF_SL_011	The system shall allow the user to click on a mapped List Name to view detailed mapping results for that list.	Legacy Product
2026.1.0.0	FR_REF_SL_012	The system shall allow the user to open a search function from the mapping results screen, view mapping suggestions or type-ahead results for manual mapping candidates and select a desired option from the search results to perform manual mapping.	Legacy Product
2026.1.0.0	FR_REF_SL_013	The system shall allow the user to hover the mouse over an information (Info) icon in the mapping results to view insights about the mapped data.	Legacy Product
2026.1.0.0	FR_REF_SL_014	The system shall allow the user (an NCA user) to open the Translations screen and select a Referentials list for translation from the List Name column.	Legacy Product
2026.1.0.0	FR_REF_SL_015	The system shall allow the user to search translations and reveal advanced filters, refining translations by SPOR Language, Translate To, Term Status, Domain, Include, and Tags.	Legacy Product
2026.1.0.0	FR_REF_SL_016	The system shall assign a Resolution Status to every uploaded Referentials Source Term to describe how well the term was matched to target RMS master data.	Legacy Product

Product Name:	SPORIFY 2026.1.0.0	Document Type:	User Requirements Document
Document Name:	AG_SPOR_URD	Document Version:	4.0

Release Number	URD #	Description	Requirement ID
2026.1.0.0	FR_REF_SL_017	The system shall support the following Resolution Status values for Referentials Source Terms: Matched, Multiple Choice, Suggested, and Not Set.	Legacy Product
2026.1.0.0	FR_REF_SL_018	The system shall set the Resolution Status to Matched for a Referentials Source Term when an exact match is found to a target RMS term.	Legacy Product
2026.1.0.0	FR_REF_SL_019	The system shall set the Resolution Status to Multiple Choice for a Referentials Source Term when more than one exact match is found to target RMS terms.	Legacy Product
2026.1.0.0	FR_REF_SL_020	The system shall set the Resolution Status to Suggested for a Referentials Source Term when similar or close RMS terms are found that require user confirmation.	Legacy Product
2026.1.0.0	FR_REF_SL_021	The system shall set the Resolution Status to Not Set for a Referentials Source Term when no sufficiently similar RMS term is found.	Legacy Product
2026.1.0.0	FR_REF_SL_022	The system shall display, for each Referentials Source List, a progress bar showing the percentage breakdown of Resolution Status values (Matched, Multiple Choice, Suggested, Not Set) across all terms in that list.	Legacy Product
2026.1.0.0	FR_REF_SL_023	The system shall display, for Referentials Source Lists, an overall progress bar summarising the percentage breakdown of Resolution Status values across all Referentials Source Lists.	Legacy Product

Product Name:	SPORIFY 2026.1.0.0	Document Type:	User Requirements Document
Document Name:	AG_SPOR_URD	Document Version:	4.0

Release Number	URD #	Description	Requirement ID
2026.1.0.0	FR_REF_SL_024	The system shall display Resolution Status for Referentials Source Terms as a color-coded icon or label beside each record in the grid, with match types (e.g. Exact, Suggested, User Selected) visually distinguished even when mappings are imported by ID.	Legacy Product
2023.1.3	FR_REF_SL_025	The system shall allow the user to update the Resolution Status on multiple Source Referential in bulk, once the user has applied a filter to their search result set.	SPRFY-783
	FR_REF_TGT	Referentials Target Lists & Terms	
2026.1.0.0	FR_REF_TGT_LIST_001	The system shall allow the user to access Referentials Target Lists from the Referentials area and view them in List View and Term View.	Legacy Product
2026.1.0.0	FR_REF_TGT_LIST_002	The system shall allow the user to access the Target Lists View screen and open a hierarchical Referentials Target List (Hierarchy View).	Legacy Product
2026.1.0.0	FR_REF_TGT_LIST_003	The system shall allow the user to access Target Lists in the Referentials area, open the Target Lists List View, and open a target list's detail page.	Legacy Product
2026.1.0.0	FR_REF_TGT_LIST_004	The system shall allow the user to mark or unmark a Referentials Target List as a favourite by toggling the favourite (star) icon.	Legacy Product
2026.1.0.0	FR_REF_TGT_LIST_005	The system shall allow the user to click a language link in Term Languages to view the list for that language.	Legacy Product
2026.1.0.0	FR_REF_TGT_LIST_006	The system shall allow the user to add and remove tags to Referentials data records, including Target Lists, Source Terms, and Target Terms.	Legacy Product
